

Performance Goggles:

High density polycarbonate lenses which provide strong endurance.

Gaskets in selected quality elastomer/foam cushion to offer best fitting.

Super anti-fog coating on inner lenses.

100% UV cut lenses for maximum eye protection.

Easy-adjust headstrap.

Congratulations! You have just purchased a pair of quality goggles which would serve you for a long time if you take appropriate care of them.

Direction for Use:

Place lenses over eyes with nosestrap at top. Gently extend headstrap over head.

Adjust the length of headstrap and nosestrap position for best fit (mis-fitting causes leakage). Fit should be snug but comfortable.

Maintenance:

Rinse with cold fresh water after every use. Dry in shaded area and avoid direct sunlight. Store in cool dry place.

The inner lenses are treated with anti-fog coating to give excellent vision. DO NOT wipe or rub inner lenses.

Caution:

Use care when putting on and removing goggles, especially when wet.

Adult supervision required for use by children.

Discontinue use immediately if irritation or discomfort occurs.

DO NOT dive in water with goggles unless properly trained.

DO NOT pull the goggles away from face as they may spring back and cause injury.
